LESSON 6

Working with People living with TB

Using Football Exercises regarding the Topic

The Life Skill listed below will be focused on in this lesson. It is incorporated in the Football Exercises on the following page.

communication  decision making  health awareness

perseverance  reliability  teamwork  trust

Types of Equipment useful for these Exercises

Pitch  Footballs  Cones  Bibs  Goals

Whistle  Watch / Stopwatch
**LESSON 6**

**Working with People living with TB**

**EXERCISE 7**

**Shoots competition**
- The player starts to dribble into the slalom-course, when the coach gives a short cough. Either covering, or not covering, his/her mouth.
- Depending on the coach covering his/her mouth or not covering his/her mouth, the player has to shoot on the left or right goal (refer to diagram) using the optimal foot. (left goal - left foot, right goal - right foot).

**Progression**
- Start with a shorter distance to the goal for beginners and increase it as they get used to it.
- Create a single competition: a right decision one point + goal another point. How many times in the end of the game?

**EXERCISE 8**

**“Stronger together”**
- The coach divides the players into two teams.
- The players must pass the ball five times in order to be allowed to shoot at the goal.
- Once a goal is scored, the other team loses one team member.

This exercise teaches the player, even when focused on a task, to be aware of his/her surroundings. A skill important in both football and everyday life.

A team works best together. To be an effective team, it is vital to look past 'short comings' and focus on the strengths of the members!
